

GEOGRAPHY II**23/03/ 2026 09:00 – 12:00**

School name:

SUBJECT: GEOGRAPHY**COMBINATIONS:**

- MATH-ECONOMICS-GEOGRAPHY (MEG)
- MATH-PHYSICS-GEOGRAPHY (MPG)
- HISTORY-GEOGRAPHY-LITERATURE (HGL)

DURATION: 3 HOURS**INSTRUCTIONS:** 1) Write your names properly on the answer

booklet as written on your registration form.

2) Do not open this question paper until you are told to do

3) This paper has two parts: **Part I** and **Part II****Part I: Physical Geography (60 marks)****Part I: Section A:** Attempt **all** questions**Section B:** Attempt **only 2** questions**Section C: One (1)** compulsory question**Part II: Human and Economic Geography (40 marks)****Section :** Attempt **all** questions4) Use **blue** or **black** pen.

5) For all multiple choice questions, circle the correct answer

TOTAL MARKS...../100**FOR EXAMINER'S USE ONLY**

Part I: Physical Geography (60 marks)

Section A: Attempt all questions (30 marks)

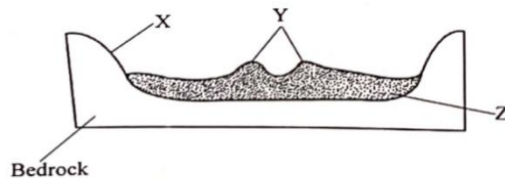

For all multiple choice questions, circle the correct answer

- 1) i) What **primarily** drives the surface ocean currents? **(2 marks)**
- Density differences between water bodies
 - Rotation of the Earth on its axis
 - Coriolis forces
 - Regional winds patterns
- 2) i. There are four towns which have the same latitude and altitude, but their January Mean temperatures are all different, which town is farthest from the sea? **(3 marks)**
- a) 8°C b) -12°C c) 10°C d) -6°C e) 3°C

- ii. Which one of the following is not a condition necessary for growth of hot desert vegetation? **(3 marks)**
- The presence of poor quality and infertile soils.
 - Availability of about 250mm or less as total rainfall per year.
 - The prevailing of high temperatures ranging between 29°C to support the growth of plants associated with arid areas such as deserts.
 - This requires soils associated with relatively high soil salinity.

- 3) The diagram below represents a cross-section of a flood plain.

Name the features marked X and Y

(2marks)

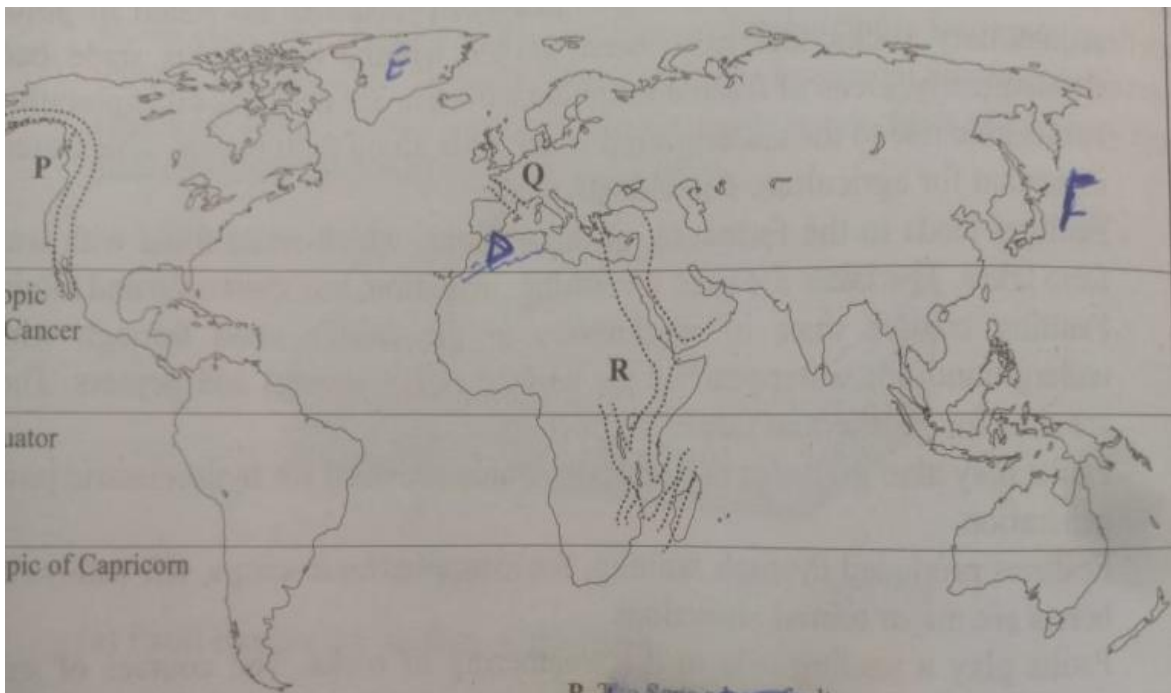

- ii) A community near a braided river channel is experiencing frequent floods. Which measure would be most effective? **(2 marks)**

- Removing vegetation
 - constructing levees
 - deepening the channel with dredging
 - blocking distributaries
- 4) Which of the following best describes a dwarf planet? **(2marks)**
- A small star like Sirius
 - An asteroid belt object only
 - A planet body that orbits the sun but has not cleared its orbit
 - A small gas giant outside Neptune
- 5) i. Faulting is the fracturing of the crust rocks due to the influence of endogenic forces, which of the following is not a type of fault. **(2marks)**
- thrust fault.
 - Trap door fault
 - Strike-slip faults.
 - Fault scarp.
- ii. Which of the following landforms is an impact of folding on landscape? **(2 marks)**
- Rolling plains.
 - Plateau.
 - plains
 - Tilt blocks landscape.
- 6) i. What is the main division of soil catena where weathered materials are washed out downwards? **(2 marks)**

- a. The elluvial complex b.The colluvial complex c.The illuvial complex
d.All the above.
- ii.Which of the following is a negative impact of soil catena on human activities. **(2 marks)**
 - a. The soil catena is used for settlement.
 - b. The soil catena is not used for rock quarrying for construction.
 - c. The hill top bottoms are used for brick lying e.g: Ruliba clay works.
 - d. The elluvial complex is used for agriculture due to the deep soil profile derived from deposition.
- 7) i. Which of the following is the correct order of example of low clouds (from below 2,000metres) from types of clouds? **(2 marks)**
 - a. Cumulus, Stratus, Alto-cumulus.
 - b. Stratus ,Nimbo-stratus,cumulo-Nimbus
 - c. Nimbo-stratus, strato-cumulus, Stratus.
 - d. Cirrus, cirrostratus, cirro-cumulus.
- ii.Which of the following best describes the characteristics of polar climate? **(2 marks)**
 - i. The winters are dry.
 - ii. The winters are associated with one continuous night, summers are one continuous day.
 - iii. Winters are cool (21⁰c).
 - iv. There is rain in winter while the summers are dry.
- 8) i. A set of logically arranged questions used to gather information from respondents is called: **(2 marks)**
 - a. Interview. B. Questionnaire c. Survey d.Observation guide.
- ii. Why is sampling often preferred in large populations? **(2 marks)**
 - i. It is more expensive.
 - ii. It takes more time.
 - iii. It is manageable and time saving.
 - iv. It avoids the need for analysis.

SECTION B: Attempt only two questions of your choice. (20marks)

- 9) The map of the world below shows different physical features. Use it to answer the following questions:

i. Name faulted regions marked R and Q **(2marks)**

R.....

Q.....

ii. What is the name of the physical feature labelled D **(2marks)**

.....

iii. Name the island marked E on the map**(2marks)**

.....

iv. Name the major fishing ground marked by F **(2marks)**

.....

v. Give two ocean currents that favour fishing ground of F**(2marks)**

.....

.....

10) i. Explain five human causes of desertification. **(5 marks)**

.....

.....

.....

.....

.....

.....

.....

ii.If you were the director general of REMA.demonstrate five adaption measures to climate change in Rwanda. **(5 marks)**

.....

.....

.....

.....

.....

.....

.....

11)To what extent is vulcanicity responsible for the shaping of the landscape of Rwanda? **(10 marks)**

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

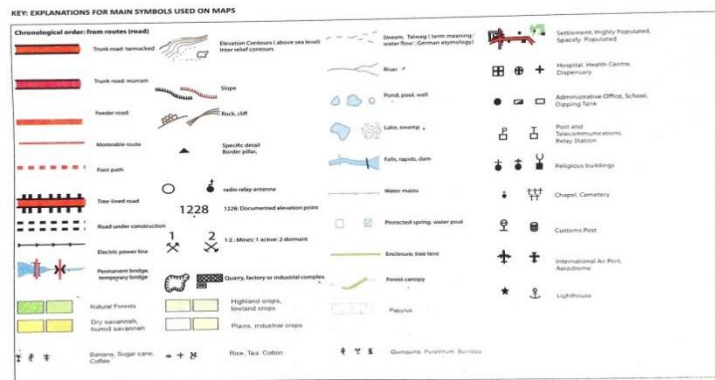

.....

.....

.....

.....

12) Study the topographic map provided below and then answers the questions that follow.

- Page 5 of 7

Part II: Human and Economic Geography (40 marks)

Section : Attempt **all** questions (30 marks)

- 13) Answer by **true** (T) or **false** (F) (4 marks)
- a. Anthracite is the hardest type of coal and contains about 95% carbon.
 - b. Petroleum is a renewable source of energy.
 - c. Solar panels directly convert sunlight into electricity.
 - d. Tidal energy can only be produced in areas with large tidal ranges of at least 4–5 meters.
- 14) i. Which of the following is the correct definition of *industrialization*? (2 marks)
- a. The process of extracting minerals from the earth
 - b. The concentration of industries in a specified location for manufacturing goods
 - c. The practice of farming to produce crops
 - d. The process of increasing tourism activities
- ii) Which of the following is NOT a primary industry? (2 marks)
- a. Mining b. Forestry c. Shipbuilding d. Fishing
- 15) i. Eco-tourism primarily focuses on: (2 marks)
- a. Mass tourism for profit
 - b. Community involvement in managing natural sites
 - c. Building luxury hotels
 - d. Industrial development
- ii. Which is the **most effective** way to control poaching in national parks? (2 marks).
- a. Increasing entry fees
 - b. enforcing strict anti-poaching laws and patrols
 - c. planting more trees
 - d. Advertising wildlife
- 16) The movement carried out by the Fulani with their animals in search of pastures and water is known as: (2 marks)
- a) sedentary pastoralism
 - b) Transhumance
 - c) Shifting grazing
 - d) Seasonal grazing
 - e) Dry farming.
- 17) i. One characteristic of urban centers in Rwanda. (2 marks)
- a. Use of imidugudu scheme
 - b. Predominantly agriculture –based employment.
 - c. Poor waste disposal and slum settlement.
 - d. No traffic congestion.
- ii. Major problems in developing country cities include: (2 marks)
- a. language loss only
 - b. Land surplus for agriculture
 - c. pollution, congestion, unemployment.
 - d. Ideal infrastructure.
- 18) A landlocked country aiming to boost exports would most benefit from: (2 marks)
- a . Building inland ports linked to major railways
 - b . Expanding domestic air transport
 - C. Planting more forests
 - D. Increasing road tolls
